Kenton Stock Guide

Established in 1986 Kenton has grown and developed into one of the UK's market leaders. We believe this success has been achieved through consistently delivering exceptional customer service and quality.

Should you ever have any comments regarding this catalogue or any aspect of Kenton service please telephone us, we value your opinion.

We offer:

- Next working day delivery, UK-wide
- An extensive stock range
- Non-stock sizes and patterns within 5-7 days
- Specials made to order to your specification
- Competitive pricing
- Genuine care for our customers

About this guide. This is our stock range: everything listed is on the shelf in Bristol for next working day delivery. Grey cells marked 5-7 days are made to order in the same pattern. Hundreds more patterns, materials and mesh types are made to order in 5-7 days; they are all listed in the full Kenton Product Guide, or just ask. If you do not see what you require then please contact our sales dept: **0117 963 4579**.

Perforated balustrade infill panels

Perforated facade cladding

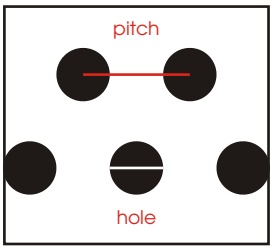
Perforated stair treads on an external stair

How to read this guide

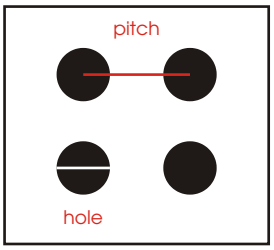
Pattern names

Every perforated pattern is named by its hole and its pitch. **R3 T5** is a 3mm round hole on a 5mm staggered pitch.

R round hole, size in mm
C square hole, size in mm
T staggered (60°) pitch in mm
U square (in line) pitch in mm



T – staggered pitch



U – square pitch

Pitch is measured from the centre of one hole to the centre of the next.

Kenton pattern codes

K030M is pattern 030 (R3 T5) in mild steel. The number identifies the hole and pitch, the last letter the material:

M mild steel
G pre-galvanised steel
A aluminium
S stainless steel 304
S6 stainless steel 316

Order by the code or by the pattern name, whichever you prefer. Every code is listed in the code index at the back.

Availability

In-stock on our shelves now, for next working day delivery, UK-wide
5-7 days made to order
Blank not a standard size: ask us about specials made to order to your specification

Open area

The percentage of the sheet that is hole. Printed beside every pattern.

Pattern type	Open area %
Round hole, staggered pitch	90.69 x (hole ÷ pitch)²
Round hole, square pitch	78.54 x (hole ÷ pitch)²
Square hole, square pitch	100 x (hole ÷ pitch)²

Weight guide

kg per m² = thickness (mm) x density x (1 – open area)

Material	Density	Solid sheet, per mm
Mild & pre-galvanised steel	7.85	7.85 kg/m²
Stainless steel 304 & 316	8.0	8.0 kg/m²
Aluminium	2.71	2.71 kg/m²

Example: R3 T5 (33% open) in 1.5mm mild steel is 1.5 x 7.85 x 0.67 = 7.9 kg/m², so a 2000x1000mm sheet weighs about 16kg.

Wire gauge to mm

swg	10g	12g	14g	16g	18g	20g	22g
mm	3.25	2.64	2.03	1.63	1.22	0.91	0.71

When you call or email, it helps to tell us: the material, the pattern (name or Kenton code), the thickness, the sheet size or cut size, how many, and where it is going.

Tel: **0117 963 4579** holes@kentons.biz

Stock range at a glance

Every perforated pattern we hold on the shelf, by material, smallest hole first. The pattern name gives the hole and pitch in mm (R3 T5 = 3mm round hole, 5mm staggered pitch). Click a pattern or page number to go to its full table of thicknesses and sheet sizes. Patterns not listed here can be made to order in 5-7 days: see the full Kenton Product Guide, or call us.

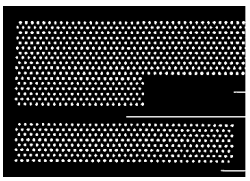
Kenton Special Manufacturing Service

In addition to our comprehensive stock range we can quickly and economically manufacture specific items you may require.

- Specific hole sizes
- Specific pitches and patterns
- Unperforated areas and margins
- Architectural and visual panels for creative design features



WITHOUT MARGIN

UNPERFORATED AREA

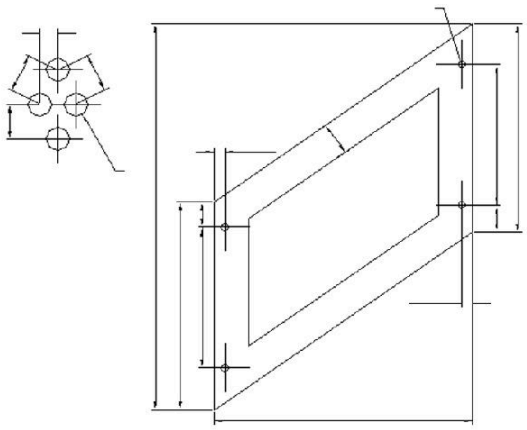
UNPERFORATED STRIP

WITH MARGIN

Please contact our Sales Department to find out just how cost effective manufactured items can be.
Tel: 0117 963 4579

Balustrading Panels

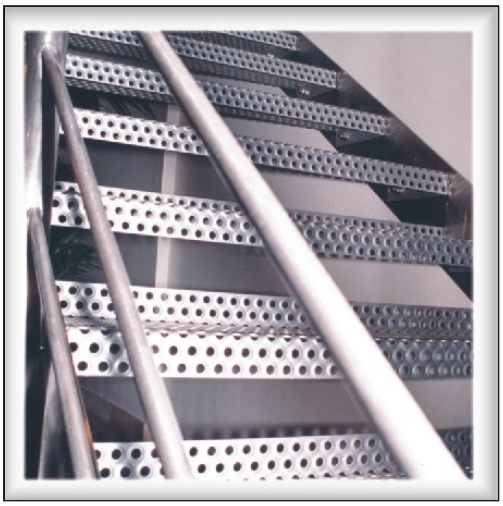
We can offer quick cost effective solutions to your balustrading requirements whether manufactured with plain margins, fixed with edging strip or specific fixing holes.



Kenton Raised Walkway

Two anti-slip surfaces, both held in stock and both made up into treads, panels and platforms to your sizes (see over). **Kenway** is our raised perforated treadplate: 3mm sheet with every hole pressed up into a raised, slip-resistant ring. **Raised expanded mesh** is the heavier open-grid surface for platforms, ramps and plant walkways. Both grip in wet, oily or icy conditions, let liquids and debris drain straight through, and are light enough to handle and fit without lifting gear.

Kenway raised perforated treadplate



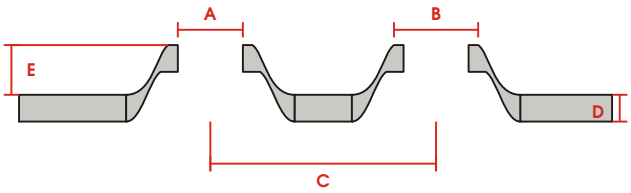
Kenway stair treads, folded with nosings and fitted to steel stringers

Kenway stock range

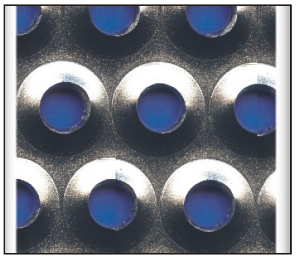
Pattern	Material	Thickness	Sheet (mm)	Availability
R10 T24	Mild Steel	3mm	2500 x 1250	**In-stock**
R10 T24	Stainless 304	3mm	2500 x 1250	**In-stock**
R10 T24	Aluminium	3mm	2500 x 1250	**In-stock**

One pattern, R10 T24: 10mm holes on a 24mm pitch, each pressed up 5mm into a 12.5mm ring. Stocked in all three materials as 2500 x 1250mm sheets and cut to size to order. Mild steel can be primed or hot-dip galvanised; stainless 304 is the choice for food, marine and wash-down areas; aluminium where weight matters.

Perforation detail

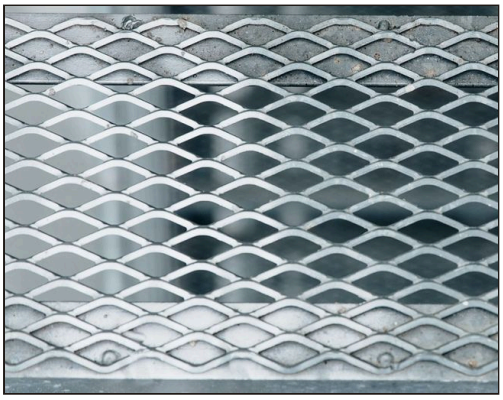


A	Hole	**10mm**
B	Raised ring	**12.5mm**
C	Pitch	**24mm**
D	Sheet	**3mm**
E	Raised height	**5mm**



Kenway raised holes, close up

Raised expanded walkway mesh



Raised expanded mesh stair tread, galvanised

Unflattened (raised) expanded mesh in mild steel: every strand sits at an angle, so the whole surface grips and stays clear of mud and ice. 6240M is our standard walkway grade; 5230M and 7630M suit lighter duties; 4530M, the heaviest mesh (shown opposite, bottom right), is made to order for the toughest plant and wash-down areas. Supplied in full sheets, cut to size, or folded into treads and panels in the same way as Kenway, and hot-dip galvanised after fabrication if required.

Mesh	LWD x SWD	Strand	Thickness	Sheet size (mm)	Availability
6240M	61 x 25mm	6.1mm	4.5mm	2440 x 1220	**In-stock**
5230M	51 x 23mm	3.1mm	3mm	2440 x 1220	**In-stock**
7630M	76 x 34mm	3.6mm	3mm	2440 x 1220	**In-stock**
4530M	45 x 13.5mm	5mm	3mm	2000 x 1000	5-7 days

Typical uses: stair treads and landings · access platforms and mezzanines · fire escapes · ramps · plant-room and roof walkways · vehicle and trailer steps · stainless for food, marine and chemical areas

In-stock 5-7 days = made to order Blank = not a standard size

Stock levels change daily, please call to confirm. If you do not see what you require then please contact our sales dept.

Walkway treads & panels made to measure

Tell us what the tread or panel has to do and we will make it up for you. Kenway sheet and walkway mesh are cut, folded and drilled to your sizes, so the pieces arrive ready to bolt down. Folds are kept on the unperforated margin so every edge is straight and clean.

What we can make

Stair treads folded from Kenway or walkway mesh, with a downturned nosing at the front and an upstand at the back; end plates drilled or slotted for bolting to stringers.

Walkway panels single sheets or mesh with folded side channels for stiffness, or fitted with side kick-plates; lengths to suit your support centres.

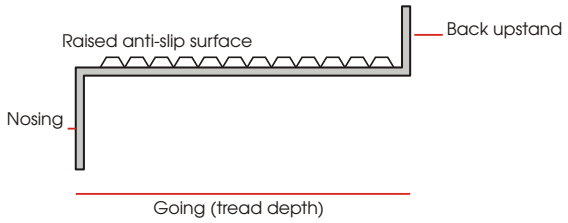
Platforms and landings panels cut round columns, pipes and openings from your drawing.

Cut to size any sheet cut to your sizes with the perforation kept clear of the cut edge.

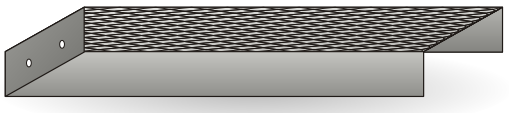
Fixing holes and slots positioned to your drawing.

Finishes mild steel supplied self-colour, primed, or hot-dip galvanised after fabrication; stainless and aluminium left natural.

Stair tread, side view

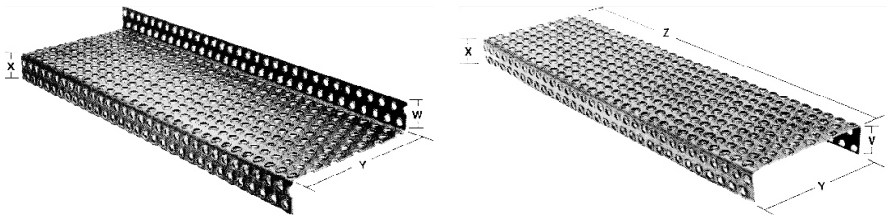


Walkway panel with folded side channels



Mesh panels are folded down both long sides to make a rigid channel that spans between supports without a frame. Kick-plates, end plates and fixing cleats can be added.

Folded tread or panel: the sizes we need



Folded tread with front flange and back upstand (left); tread with front and back flanges (right)

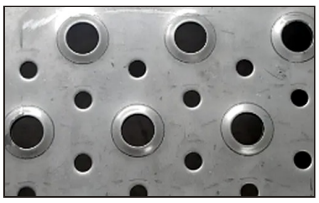
Z	Length
Y	Width (going)
X	Front flange depth
V	Back flange depth
W	Back upstand height

If fabrication is required please confirm the V, W, X, Y and Z dimensions. X, V and W should be 30mm or more so the fold sits on plain metal; we recommend that bending and shearing take place between the perforated areas to maintain the quality of finish. If the tread must match an existing flight, send us a sketch or a sample.

When you enquire, it helps to tell us: what it is for (tread, panel, platform) · the material and finish · the sizes V, W, X, Y and Z or a drawing · the number of pieces · the span between supports · the load it will carry · when you need it. Tel **0117 963 4579** holes@kentons.biz

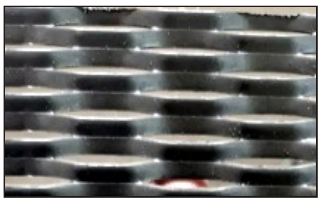
Anti-slip surfaces we can supply

Kenway R10 T24 raised hole, 3mm. In stock.



Raised holes with drainage perforations. Made to order.

Raised slots for heavy soiling and wash-down. Made to order.

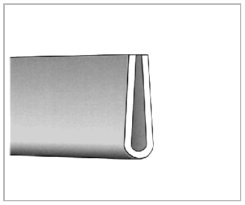


4530M walkway mesh, 45 x 13.5mm, 3mm. Made to order.

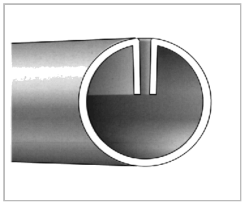
Kenton Profile Edging

Edging strip finishes the cut edge of a Kenway sheet, mesh panel or perforated guard: it covers the sharp edge, protects hands and clothing, stiffens the panel and gives a neat, finished look. It is pressed on over the edge of the sheet and can be cut to length and fitted by us, or supplied loose in full lengths. Because the strip is bent to fit, the depth of the strip and the length are what matter when ordering.

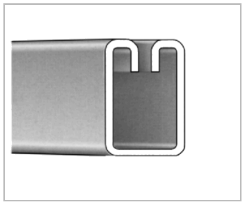
Profiles



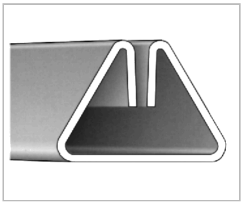
KU-C
U edging
Stocked in mild steel, stainless 304, aluminium and pre-galvanised. 3810mm and 2500mm lengths.



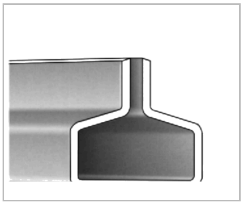
KR-B
Round edging
Stocked in mild steel and stainless 304. 3000mm lengths.



KS-B
Square-cornered U with retaining lip
Made to order in 5-7 days. 3000mm lengths.

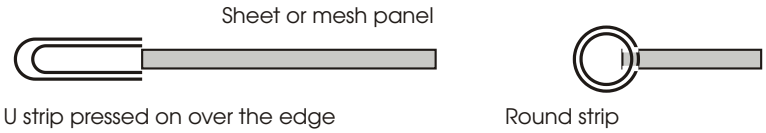


KT-E
Triangular section
Made to order in 5-7 days. 3000mm lengths.



KT-S
T section
Made to order in 5-7 days. 3000mm lengths.

How it fits



U strip pressed on over the edge

Round strip

The strip is pressed on over the cut edge of the sheet and grips it. Choose the depth to suit the sheet thickness and how much of the edge you want covered. We can cut it to length and fit it to panels we make, or supply it loose in full lengths for you to fit.

Stock range

Profile	Depth	Length	Material	Availability
U edging	19mm	2500mm	Aluminium	**In-stock**
Round edging	16mm	3000mm	Mild Steel	**In-stock**
Round edging	16mm	3000mm	Stainless 304	**In-stock**
U edging	30mm	2500mm	Stainless 304	**In-stock**
U edging	19mm	2500mm	Stainless 304	**In-stock**
U edging	12.7mm	2540mm	Mild Steel	**In-stock**
U edging	31.75mm	3810mm	Mild Steel	**In-stock**
U edging	19mm	3810mm	Mild Steel	**In-stock**
U edging	31.75mm	2500mm	Pre-Galvanised	**In-stock**

Other depths, lengths and materials are made to order in 5-7 days. Stainless 304 edging can be supplied polished (240 grit) on request. Tell us the sheet thickness the strip has to fit, the profile, the material and the total length needed.

In-stock 5-7 days = made to order Blank = not a standard size
